EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issued fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Jiawei Haung (Reg. No. 43,330) on 05-19-20.

The following changes have been made to the subject application:

In the claims:

Claim 1:

Line 19, delete "an output terminal of".

In the Abstract

Line 11, delete "This strengthens the noise immunity of the circuit".

Reason for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art reference of records fails to teach or fairly suggest a capacitive high-side switch driver comprising: first and second buffers receiving complementary input signals; first and second capacitors coupled to the outputs of the buffers; high-side and low-side transistors; a charge-pump diode receiving a bias voltage at the anode and having the anode coupled to a bootstrap capacitor; a bridge rectifier coupled in parallel with the bootstrap capacitor as called for in claim 1. Therefore, claims 1-13 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
